## Online CAD & Specs for Ronstan Architectural Tensioning Systems

(Largo, FL – January 10, 2005) Ronstan International Inc, a world-leading manufacturer of stainless steel cable and rod tensioning systems for architectural design, now offers a comprehensive library of CAD drawings and specifications online. The library is capable of working with all software packages, including AutoCAD, Vectorworks, Microstation, and Briscad. Utilizing Autodesk’s “i-drop” technology, Ronstan’s CAD library is enabled for fluid transfer of files across all platforms. Ronstan developed these resources to provide design professionals a simple and efficient means to transfer product information directly into their design drawings. Go to [www.ronstan.com/arch/links.asp](http://www.ronstan.com/arch/links.asp) to access this free resource or call 727-545-1911 for more details.

Ronstan is a worldwide manufacturer of stainless steel cable and rod tension systems for architectural design. Stainless steel tension elements are “low visual impact” structural and aesthetic solutions perfect for cross-bracing and truss support. Stainless Cable Systems are also the critical elements in tension fabric designs, ideal for aesthetically pleasing catenary and tie-back cables. Ronstan’s systems will complement your tension structure or awning design, while providing specific termination hardware that has been designed to conform to your design challenges. Call 727-545-1911 for a catalog or go to [www.ronstan.com/arch](http://www.ronstan.com/arch).
