The Tensor Corporation to Acquire Tensor Group Limited Acquisition Secures Global Reach of Site Development Solutions Leader

Atlanta, GA – May 26, 2006 – The Tensor Corporation, a leading developer and manufacturer of technology-driven site solutions, has signed a definitive purchase agreement to acquire Tensor Group Limited (TGL), parent company of Tensor International Limited. Founded in Blackburn, England in 1952, Tensor International (formerly Netlon Limited) is the inventor of the integral geogrid. Tensor® Geogrids are now widely used in soil stabilization, earth retention and foundation support applications.

“The acquisition of TGL will enable us to become the global leader for innovative, cost effective solutions in the site development market,” said Phil Egan, President and CEO of The Tensor Corporation. “Our combined strengths will provide unprecedented opportunities to cross-market our respective products, enhance both our technology development and production capabilities and coordinate sales activities worldwide.”

“This move brings all of Tensor’s proprietary technologies, manufacturing capabilities and distribution networks under one roof,” added Bob Vevoda, Tensor Earth Technologies President. “With our customer base becoming more global, we will now be able to service them seamlessly, no matter where their projects may be located.”

The impact is indeed global. Tensor International serves commercial, industrial and transportation customers in Europe, Asia, Africa, the Middle East and Australia. The Company maintains regional offices in the United Kingdom, Germany, Sweden, China and the United Arab Emirates; distributor support

offices in France, the Netherlands, Czech Republic, Russia, Australia, Indonesia and Malaysia; and a worldwide network of more than 80 select distributors. Manufacturing facilities are located in Blackburn and in Wuhan, China. The Company's success complements The Tensar Corporation's efforts in North and South America, resulting in combined business activities in 85 countries across the globe.

The Tensar Corporation's acquisition of Tensar Group Limited is expected to be completed in June.

About The Tensar Corporation – Headquartered in Atlanta, Georgia, The Tensar Corporation provides site development solutions and other technologies through its four subsidiary business units: Tensar Earth Technologies, Geopier Foundation Company, North American Green and Tensar Polytechnologies. With manufacturing facilities in Morrow, Georgia and Evansville, Indiana, and with business development personnel in more than 50 locations across the United States, Canada and Latin America, The Tensar Corporation is well positioned to provide customized solutions to common earthwork construction challenges. Based upon the Company's "faster, better, cheaper" business model, these solutions include high performance, leading-edge systems and products that save time and money.
