Environmentally Sustainable Green Site Furnishings from BRP Enterprises Inc (Since 1996)

BRP Enterprises Inc (Since 1996) manufactures & distributes environmentally sustainable green Division 2 Site Amenities & other related construction materials, along with providing various engineering consulting services. Founder & CEO, Burkett R Powell (BSIE 1994, MSIE 1996), set the company's initial design & engineering specification standards shortly after incorporating the business in April 1996 while completing his Master of Science degree in Industrial & Management Systems Engineering – specializing in Non-traditional Manufacturing & Materials Science – at the University of Nebraska in Lincoln. Burkett continues to oversee the BRP Corporate Quality Standards for the company.

All material certified by the BRP Enterprises branded sticker Seal of Approval is 100% compliant with the official requirements of the United States (US) Americans with Disabilities Act (ADA), as well as with the American Society of Landscape Architects (ASLA) 2001 policy statement regarding its similar disabilities standards. BRP Enterprises has even taken additional steps to ensure the highest aesthetics level of its site features creativity and flexibility, thereby maximizing opportunities for both the disabled and able bodied. Through the application of the principles of universal design, BRP Enterprises has helped to remove barriers from existing facilities and construct new barrier-free facilities so that accessible features are an expected part of every place, and become an interwoven part of every facility, enhancing opportunities for the full range of users.

All BRP branded items are delivered as fully-welded units to maximize durability & eliminate costly on-site assembly, along with minimizing potential long-term future liabilities. All BRP goods arrive on-site securely enclosed in individual wooden crates ready for "set-it-&-forget-it" installation.

Each & every proprietary product offered by BRP Enterprises is manufactured with & contains 100% recycled raw materials – with the technical exception that BRP structural pipe-sized tubing may contain up to 40% non-recycled iron ore, Ipe & Teak hardwoods are harvested from globally certified environmentally sustainable forests, & hardware may not apply.

BRP Enterprises continuously engineers its products to ensure the best possible quality & recently completed its most recent laboratory tests – one structural & the other on the trademarked Mastercoat™ finish. The Mastercoat™ finish is applied using a copyrighted system involving a sophisticated 12-step process that includes a premium double-layer powder coating. CEO Powell is pleased with the results of both tests, as each one verified his hypothesis that BRP merchandise is constructed to last a minimum of 20 years. The experiments scientifically concluded a 40-year structural lifespan along with the Mastercoat™ finish lasting 20 years. As a result of these positive results, BRP is proud to offer a 20-year structural warranty on all materials & its Mastercoat™ is guaranteed separately for ten years.

As always, BRP produces bomb resistant items 100% Made In USA. Lead-time is a firm 30-45 days, & custom designs are also available. Its substantial Volume Discount program is offered for all larger orders with additional General Discounts available for qualified clients & special projects.

Under the leadership of CEO Burkett Powell & his strict design specification standards set to maximize the quality, durability, & longevity of our products, BRP Enterprises Inc & it highly-valued Staff are proud to scientifically claim that BRP merchandise has the lowest-installed-cost & lowest-cost-of-life because each unit is carefully “built-to-last” over 20 years.
