BaySaver Technologies Rebrands with New Customer-Centric Website: www.BaySaver.com

(Mount Airy, Maryland) March 13, 2007 – BaySaver Technologies, Inc. is pleased to announce the launch of its new and improved website, located at www.BaySaver.com. The new website offers many of the same great features as the previous site; however, BaySaver has implemented a more user-friendly layout as well an updated look with expanded product descriptions for its two flagship products: BaySeparator and BayFilter.

The new site features clearer navigation, more focused content, and a cleaner user interface for enhanced usability. Now engineers, developers, contractors, regulators, and environmentalists can begin with a Working With You page that specifically answers their tough questions and addresses their unique needs.

"Strategic initiatives are coming together in an integrated fashion," says Rex Hansen, BaySaver's VP of Sales & Marketing. "Because the needs of the industry are growing and evolving, the company as a whole and the messages we project have to be much more customer-centric. This new site design is the beginning of a complete rebranding effort for BaySaver Technologies."

About BaySaver Technologies, Inc.

BaySaver Technologies is one of the world's leading providers of stormwater treatment solutions, offering system design, technical advice, education, and products that separate and filter stormwater pollution. BaySeparator and BayFilter are flagship products providing the best value per treated CFS in the industry. BaySaver Technologies assists in the compliance of all federally mandated regulations set by Phases I and II of the Clean Water Act Stormwater Program, where municipalities are required to remove pollutants such as trash, oils, and sediments from stormwater. For more information or to find a BaySaver Technologies' representative in your area, visit www.BaySaver.com or call 800.BAYSAVER (800.229.7283).
