### **BaySaver Technologies' Grand Opening for West Coast Facility in Vancouver, WA**

(Vancouver, Washington) April 23, 2008 – BaySaver Technologies, a leading provider of stormwater treatment solutions, announces the Grand Opening of its newest facility in Vancouver, WA. This site will serve as the sales, operations and distribution center for the Western United States and Pacific Rim.

“This represents a major milestone for us as a rapidly growing company here on the West Coast” says Rex Hansen, V.P. of Sales and Marketing. “Our customers continue to see the greater value in our products and now we’ll be able to serve our customers better. With the recent approval from Washington Department of Ecology for the BayFilter<sup>®</sup>, we expect this office will be quite busy”.

BaySaver Technologies first opened its doors in 1997 in Mount Airy, Maryland by founder Tom Pank. BaySaver’s products have been successfully installed and continue to perform in many countries throughout the world.

#### **About BaySaver Technologies, Inc.<sup>®</sup>**

BaySaver Technologies<sup>®</sup> is one of the world’s leading providers of stormwater treatment solutions, offering system design, technical advice, education, and products that separate and filter pollution from stormwater. BaySeparator<sup>™</sup> and BayFilter<sup>®</sup> are flagship products providing the best value per treated CFS in the industry. BaySaver Technologies<sup>®</sup> assists in the compliance of all federally mandated regulations set by Phases I and II of the Clean Water Act, where municipalities are required to remove pollutants such as trash, oils, and sediments from stormwater. For more information or to find a BaySaver Technologies’ representative in your area, visit BaySaver.com or call 800.BAYSAVER (800.229.7283).
