### **BaySaver Technologies Names Craig Morton as Area Manager**

(Mount Airy, Maryland) November 9, 2007 – BaySaver Technologies, a leading provider of stormwater treatment solutions, announces the appointment of Craig Morton as Area Manager. In this position, Morton is responsible for Business Development in Northern California.

“Craig has an excellent technical background and has considerable experience in the storm water industry” said Rex Hansen, VP of Sales & Marketing at BaySaver Technologies. “His skills as a storm water inspector and educator are of great value to the BaySaver team.”

Prior to joining BaySaver, Morton worked for Richmond American Homes as Director of Storm Water Compliance. In his position he was responsible for ensuring compliance for all developments in the Sacramento region. Morton earned his Bachelor’s Degree in Business Communications at California State University.

#### **About BaySaver Technologies, Inc.®**

BaySaver Technologies® is one of the world’s leading providers of stormwater treatment solutions, offering system design, technical advice, education, and products that separate and filter pollution from stormwater. BaySeparator™ and BayFilter™ are flagship products providing the best value per treated CFS in the industry. BaySaver Technologies® assists in the compliance of all federally mandated regulations set by Phases I and II of the Clean Water Act, where municipalities are required to remove pollutants such as trash, oils, and sediments from stormwater. For more information or to find a BaySaver Technologies’ representative in your area, visit BaySaver.com or call 800.BAYSAVER (800.229.7283).
