

# solus

## Contemporary Design, Crafted in Concrete.

Add style and substance to any outdoor space with one of our beautiful concrete products. Our attention to quality and detail will bring a unique sophistication to your gathering space.

“We make beautiful and long lasting objects that run counter to a culture obsessed with trends and disposablility; much like concrete itself.”

## Handmade in North America

Keeping it local has been our philosophy for the last 20 years. We design, build and source all Solus products from our Vancouver, Canada facility and utilize local producers whenever possible. This allows us to keep quality high and make improvements quickly.

All our products are commercial grade and fully certified for North America and Europe (ANSI/CSA/CE). Fire Authorities, Municipalities, Insurers and homeowners can rest assured that our products are safe.

We utilize a 'cross-jet' burner system which produces a flame above the lava bed so no heat is lost into the vessel. The concrete itself never gets hot, making our fire features perfect for residential and commercial installations.

# Hemi

## Refined sculptural presence

Available in three sizes to suit any space these round fire pits add heat, atmosphere and simple sculptural beauty.

Our 'cross-jet' and ethanol burners provide ample flames and are built to last a lifetime. Three fuel types with manual or electronic start options allow these bowls to be used in all outdoor situations.

Each fire bowl is available in 10 colours and can be paired with a full bed of fire stones, a wooden lpe table top or an all-weather fabric cover for added beauty and function.

## Product variations

Sizes: (dia.) x (h) x (base)

26" x 12" x 10"

36" x 17" x 12"

48" x 23" x 17"

**Fuel Options:**    **Output in BTU's:**  
Ethanol            18,000 (26") or 60,000(36")  
Natural Gas       60,000 or 40,000 (*drink ring*)  
Propane            60,000 or 40,000 (*drink ring*)

### Ignition Mechanism:

Match-lit

Electric Start w/ set flame

Electric Start w/ adjustable flame with a safety shut off

### Accessories:

Concrete Drink Ring

### Certification:

ANSI/CSA & CE certification on the whole product; burner, electronics & vessel

Complete HEMI fire feature showing adjustable flame key/safety shut off

'Cross-jet' burners forged from solid brass

Optional Ring if horizontal surface is required

Liquid Ethanol burner (option)

Optional Ipe wood top

# Halo

## Rectilinear sensuality

Crisp outer edges that curve smoothly into a round fire opening gives a modern sculptural feel. The Halo shows off the striking and subtle qualities of our concrete. This allows the flickering flame to reflect off its polished surface, inviting people to gather around.

The low version has a deep recessed base that creates a hovering effect, giving a dramatic visual lightness. A very chic and contemporary option.

The elevated versions rest on a square base to give them table height warmth and functionality. This works well when used in conjunction with standard seating.

We apply a stain resistant coating to the top surface to help repel stains

This style is also available in 2 sizes for large or small spaces and is suitable for residential and commercial installations. A tented all-weather cover is also available.

## Product variations

### Sizes: (l) x (w) x (h)

36" x 36" x 8"      Low versions  
48" x 48" x 8"

Large 48" HALO ELEVATED version

Tented outdoor all weather cover

Custom cylindrical base

Liquid Ethanol burner (option)

Sleek 36" HALO LOW version

# Firebox & Firecube

## Square minimalism

The Firebox and Firecube are simple, adaptable fire pits with minimal detailing and a clean, structured presence. Their neat and quiet aesthetics emphasize their content around thin, smooth, concrete walls. Fill the Firebox with a full set of fire stones to give an elegant look and add a hardwood Ipe top to extend functionality.

The Firecube is ideal if you require a lot of heat in a small space. They pack a punch at 40,000BTU's. An optional concrete top is also available.

Tank Table is designed to hold (and hide) a 20lb. propane tank. Makes a useful side table and can be used in conjunction with any Solus fire pit. We coat the top surface for improved stain resistance.

## Product variations

### Firebox

Sizes: (l) x (w) x (h)  
30" x 30" x 15"

<b>Fuel Options:</b>	<b>Output:</b>
Natural Gas	60,000
Propane	60,000

Tank Table Top option hides a 20 lb propane tank

Firecube is ideal for tight spaces.

# Firetable

## Clean lined tradition

Modern, concrete tables that house a central fire, these fire pits are sturdy and functional. The simple, smooth, concrete top sections have a curved inner edge that slopes towards the fire opening and reflects the flame light. We also apply a protective coating to help resist stains.

## Product variations

### Firetable

Sizes: (l) x (w) x (h)  
51" x 27" x 19-1/2"

### Fuel Options:

Firetable 55 (available summer 2016)

# Dome

## Reflective and mercurial

These water features have polished metal domes that appear to float inside the concrete vessels. Water flows up through the center of each dome to run over the reflective surface of the hand-spun metal and then drop off the edges into the surrounding water creating sound.

Like our concrete pieces, each metal dome is handmade and unique. The variations, inconsistencies and undulations characteristic of hand-spun metal create the beautiful water movement and reflections that define these water features.

Our concrete bowls provide a solid aesthetic counterpoint to the shine of the domes and the fluidity of the water while functioning as impermeable containers. Every dome is attached to a support which holds it securely inside of it's concrete vessel. Appropriate for use indoors or out for residential and commercial installation.

## Product variations

### Dome

Sizes: (l) x (w) x (h)

26" x 12" x 10"

36" x 17" x 12"

48" x 23" x 17"

### Metal dome types:

48" Dome in stainless steel

Brass dome with satin machine finish

Rippling water refracts light on metal dome

# Scupper

## Flowing and reflective

A nod to historical architecture and nautical forms the Scupper water bowl combines mechanically formed metal with smooth hand cast concrete. These formal elements are brought to life by the movement and sound of falling water.

Entering from a central opening in the bottom of the concrete bowl, water fills the vessel creating a deep pool that spills out through the reflective channel of the scupper. The polished metal and pooled, cascading water combine to create interesting reflections as light plays over their surfaces.

Available in three sizes these water bowls can be used in a variety of situations including installations with in-ground catch basins and existing ponds. Appropriate for use indoors or out for residential and commercial installations.

Scupper with Box is a self contained system for those situations where a 'plug and play' situation is preferred. The 26" bowl version comes with a matching concrete box and the 36" bowl version comes with a stainless steel box.

## Product variations

### Scupper

Concrete Bowl: (l) x (w) x (h)

26" x 12" x 10"

36" x 17" x 12"

48" x 23" x 17"

# Attributes

## Only the highest quality parts, material & labour

Our high performance concrete is a blend of cement, aggregate, colour, and recycled fly-ash. It is cured for 28 days. It is strong, beautiful and can withstand extreme weather fluctuations. All others try to imitate what we do, but we know how to succeed.

All our burner parts and assemblies are made with Stainless steel, Brass and Aluminum. Even harsh seaside conditions will not corrode the assembly. Third party boiler parts are of commercial grade quality too. Our burners are the best in the business.

The people that work at Solus are skilled, knowledgeable and understand craftsmanship. Being a small company we don't have the luxury of sloppy work. Everyone needs to contribute to our success, and they do.

Specifications are available online from our website or search 'Solus Decor' at [www.caddetails.com](http://www.caddetails.com)

Halva

Portland

## Colours

### Halva:

Varies from oyster to bone. Tends to a slight cream tone. Warm white.

### Portland:

Natural concrete colour. A mid tone gray with slight green undertones.

### Linen:

Light beige. Warm undertones approach limestone.

### Nutmeg:

Dark beige. More brownish than linen. Think walnut shells or whole nutmegs.

### Portobello:

A lighter mid tone colour with a light olive undertone. Dark mottling makes this an intriguing colour.

### Arbutus:

A rich terra-cotta colour. Very arresting.

### Nori:

A pastel-ish green/grey. Makes one think of the sea.

### Truffle:

A warm chocolate brown. Can vary from lighter to darker but is a darker tone.

### Shiitake:

Very dark toned grey with a warm brown undertone.

### Cinder:

Our darkest charcoal grey with a slight warm undertone.

Linen

Nutmeg

Portobello

Arbutus

Nori

Truffle

Shiitake

Cinder

Please note that colours shown here are only approximate. Every batch of concrete is slightly different and exhibit unique tonal variations. Please request actual concrete samples to confirm colour choice.

# Shipping

## Nowhere is too far

Shipping concrete sounds expensive and difficult, but it's really quite reasonable and easy. We have shipped to residences, hotels, restaurants and job sites around the world. We encase the products in a custom crate to ensure protection during delivery or for on-site storage. Crates are generally delivered curbside next to your site where the top and sides can be easily dismantled with a cordless drill. Our delivery success rate is over 99%.

### Warranty

All Solus products are warranted against manufacturers defects for periods ranging from 1 year to 25 years, depending on product or part. By purchasing (and using) a Solus All Weather Cover we will extend the warranty period to the maximum available. Please inquire for details.

### Sales and Support

Our Sales and Support team are professional and friendly and can answer any questions you may have. So please, give us a call and we can help find the right product for your project.
