

METALCO

SUSTAINABLE ENERGY & MANUFACTURING PROCESS

Metalco's products boast innovative forms dedicated to products' functionality and embody a worldwide renown style. Luxury is made of colors, beauty, distinctiveness, prosperity and makes every citizen and visitor feel like they are at home. Metalco is focused on ecology, energetic and productive eco-sustainability.

The greatest attention is given to the ecology, specifically through: the use of wood from certified forests that are managed fairly and responsibly; 100% recyclable products in every component; energy demands completely covered by our own photovoltaic system installed on the roof of our building.

Metalco avoids emitting around 5,000 tons of CO2 into the atmosphere each year, equivalent to the consumption of 300 homes.

id created, Inc. is a US based company with exclusive rights to distribute Metalco srl products in the US and Canada.
