</table>

NOTES
1. Corallock® Atlantic Series ships from the East Coast and West Coast factories.
2. You can expect a slight variation in shade color and patterns which again, simply adds to the natural appearance of each piece.
3. Before making a decision on any product or color, we recommend verifying your selection at your local Artistic Paver retailer.
4. For more information on this product visit http://www.artisticpavers.com/steplock-corallock.php

<td>INTERLOCKING SAND-SET BEVELED PAVER</td>
<td>Corallock® pavers are part of our Steplock® Line, exclusively designed for pedestrian applications including patios, swimming pool decks, lanais, walkways and more. The bevelled cushioned edge on our pavers help to prevent tripping hazards and aids the installer in the leveling process of the paver installation. Each paver is factory pressed which produces a paver that averages over 9,000 pounds per square inch (PSI). This makes our paver extremely durable and less porous than poured concrete. This highly dense product resists staining, helps to prevent algae and mildew from attaching itself to the surface of the product and it's impervious to damage from saltwater pools. Our pavers require very little maintenance and sealing is optional.</td>
